

SRM Series connectors are particularly suitable where current rating and voltage drop require-

ments dictate a larger wire size than can be used with other subminiature connectors.

SPECIFICATIONS

Current Rating: 7.5 Amps

No. of

Contacts: 5, 7, 11, 14, 20, 26, 34, 50, 75, 104

Pin Contacts: .040 dia. brass, gold plated.

Socket

Contacts: Phosphor, bronze, gold plated.

Termination

Types: .048 dia. solder cups will accept up to #20 AWG stranded wire. Dip Solder Contacts, .030 dia. Check Sales Dept. for available lengths.

Electrical Data: Minimum dielectric withstanding voltage is one minute at 1500 VAC when tested in accordance with MIL-C-28748.

Dielectric: Glass-filled diallyl phthalate - grey- per MIL-M-14, SDG-F.

Guides: NSS Type, stainless steel; or N Type, brass.

Jackscrews: Stainless steel with knurled and slotted aluminum knobs.

Hoods: Anodized aluminum. May be applied to either plug or receptacle. Both top and side openings are available.

Shells: Polarized shells are available. SRM connector assembled with a shell changes part number from SRM _____ to XSRM _____.

OUTLINE JACKSCREWS & JACKSOCKETS

Dimensions are for reference only and are subject to change. Outline drawings on request.

Jackscrew locking device assures positive coupling of engaged connectors to prevent accidental disconnecting from vibration or physical shock. It also aids easy connection and separation of connector plug and receptacle. Mounted connector-half houses one non-turnable fixed jackscrew and jacksocket to insure connector polarization. Mating-half houses one of the two types of turning jackscrew and jacksocket (M or C) Turnable jackscrew-jacksocket combination (M or C) assemblies on either Plug or

Receptacle, the mating connector-half (either Receptacle or Plug) must then contain fixed jackscrew-jacksocket combination (F). Both short and long turning jackscrews (M and C) have knurled and slotted knobs for locking by hand or screwdriver. Knob is assembled on shaft with a socket setscrew. Safety wiring of engaged halves is achieved by using the through-holes. Drawings show extension of standard knobs beyond hood.

PLUG SHELLS

Dimensions are for reference only and are subject to change. Outline drawings on request.

For Use With XSRM Connectors

RECEPTACLE SHELLS

Dimensions are for reference only and are subject to change. Outline drawings on request.

For Use With XSRM Connectors

MATERIAL

Shells are .031 thick aluminum, anodized for protection against corrosion. Either style - plug or receptacle - may be used to house a female insert, thus allowing "live" socket contacts to be cable or panel mounted.

Shells also provide a means by which connector polarization is accomplished - receptacle shell is slotted for engaging a polarizing pin on plug shell. Non-polarized shells have the slot and pin omitted.

POLARIZATION

The shell part numbers given in table show an asterisk (*) where the code letter for the desired polarizing position belongs - example: XSRM14-2*000 becomes XSRM14-2B000

when polarization in position "B" is desired. Specify the same position on the mating shell. For non-polarized shells, merely omit this position, e.g. XSRM14-2000.

Shell Size	Available Polarization Positions	Shell Size	Available Polarization Positions
7	A,B,C,D	34	A,B,C,D,E,F,G
11	A,B,C,D	50	A,B,C,D,E,F,G
