Stainless Steel Angle Adapter Kits for Hanger Applications

1565 PR A

PRODUCT DESCRIPTION

Stainless Steel Angle Adapters provide an effective transition allowing the installer to easily secure hangers to solid angle members or in areas where mounting holes are not easily accessible. The 9 ga. stainless steel construction remains corrosion free ensuring long term system integrity throughout extreme weather conditions. The stainless steel set bolt locks the angle adapter to standard tower members or to mounting surfaces less than 22 mm thick. The toothed jaw effectively secures large volumes of coax in heavy wind and ice loading conditions. Three 10 mm tapped holes enable the Stainless Steel Angle Adapter to accommodate hanger types which utilize 10 mm mounting hardware. Stainless Steel Angle Adapter Kits include (10) angle adapters, (10) set bolts, (10) stainless steel slotted bolts, and (10) stainless steel toothed lock washers.

TYPICAL APPLICATIONS
