Universal Angle Adapter Kits for Hanger Applications

1562 PR A

PRODUCT DESCRIPTION

Universal Angle Adapters provide an effective transition allowing the installer to easily secure hangers to solid angle members or in areas where mounting holes are not easily accessible. The 11 ga. stainless steel construction remains corrosion free ensuring long term system integrity throughout extreme weather conditions. The stainless steel set bolt locks the angle adapter to standard tower members or to mounting surfaces less than 7/8" (22.2mm) thick. Pre-formed teeth, located at the base of the angle adapters jaw, bite down on an angle and effectively secure large volumes of coax in heavy wind and ice loading conditions. 10 high compression stainless steel inserts, each having a 3/8" threaded hole, are included to allow the installer to secure hangers into position using 3/8" hardware. The unique design also allows the installer to utilize snap-in hangers to secure coaxial cable within your system. Universal Angle Adapter Kits include 10 Universal Angle Adapters, 10 set bolts, 10 stainless steel 3/8" inserts, 10 stainless steel slotted 3/8" bolts, and 10 toothed 3/8" lock washers.
