## 4" Feed-Thru Boot Assemblies for Coaxial Cable Applications

1592 PR A

### PRODUCT DESCRIPTION

Feed-Thru Boot assemblies feature a one-piece design which dramatically reduces installation time and difficulty. The split, one piece style simplifies mounting by freeing the installers hands in order to position the coax runs, insert the cushion and tighten the round member adapter clamps without having to hold two separate pieces of boot in place. Boot assemblies are designed to be fitted onto EP series Entry Panels in wall-roof feed-through applications. The durable boot is unaffected by ozone, sunlight, aging, or hot and cold extremities, and is designed to meet ASTM-12000 AND ASE J 2000 specifications. Each boot assembly includes the boot and two round member adapter clamps. SC-Series cushion inserts fit inside the boot assembly to hold the coax in place. The cushion inserts may be ordered with the boot or separately to accommodate specific application requirements.

### TYPICAL APPLICATIONS

### SPECIFICATIONS

4" FEED-THRU BOOT ASSEMBLY					
Part Number	Description	Rubber Thickness	"A"	Wt. Lbs. (Wt. Kg)	Kit Qty.
BA-400	4" (101.6mm) Boot Assembly (Cushion not included)	1/2" (12.7mm)	4" (101.6mm)	1.3 (0.6)	Each
