Mini Coax Support Blocks for Coaxial Cable Applications

1555 PR A (page 1 of 2)

PRODUCT DESCRIPTION

The Mini Coax Support Block is a second generation block hanger system designed specifically for wireless applications. Stackable space saving units provide versatility in all applications reducing material and installation costs by over 50% by requiring only one 3/8" or 10mm threaded rod to secure up to six runs of coax. Mini Coax Support Blocks are manufactured from a durable weather resistant Long Glass Polypropylene which exceeds the recommended temperature parameters for coaxial cable i.e. (-40° to 185° F). Thermal, chemical, and UV resistance ensure long term integrity in extreme environments including mountain tops, deserts, coastal, and industrial type applications. Molded alignment pins also serve as locking devices as the two Block Hangers are firmly tightened together to create the solid hanger.
