

CDM Quality Test Capabilities

Dimensional Verification

- Standard Measuring Devices
 - Calipers
 - Indicators
 - Radius Gages
- Optical Comparator
- Pin Gages
- Thread Gages (Plug & Ring)
- Functional Gages (Go, NoGo, Fit)

Force & Strain Testing

- Tensile Strength (Wire, Crimp, Terminals)
- Cable Pull Testing
- Axial Push & Pull
- Contract/Mating Connector Engagement & Separation Forces
 - Force Gages (oz. & lbs.)
 - Drop Gages (Go & NoGo)
- Radial Torque

Mechanical Testing

- Durometers
- Durability
- Flex/Bend
- Solderability

Environmental Testing

- Water Immersion
- Steam and Water Jet Testing
- Atmospheric Pressure/Altitude Testing
- Pressure/Leak Testing
- High/Low Temperature Testing (storage, Flex, etc.)
- Thermal Shock/Cycling
- Moisture Resistance/Humidity
- Temperature/Humidity Recording

Electrical Testing

- AC/DC Dielectric Withstanding Voltage
- Insulation Resistance
- Resistance
- Voltage Drop
- Continuity
- Voltage Standing Wave Ratio
- Insertion Loss
- Contact Resistance
- LAN Testing
- Automated and Manual Testing

Optical Inspection

- Microscopes
- Mantis Viewing System
- Recording equipment and software

RF Testing Capabilities

CDM Inc. has become a valued partner to defense contractors, telecommunications and transit equipment manufacturers through onsite RF testing capabilities.

The Rohde & Schwarz Model ZNL20 is CDM's primary Vector Network Analyzer that delivers:

- 5kHz to 20GHz test frequency range
- Two port for bidirectional measurements
- Up to > 120 dB dynamic range and <0.0045dB trace noise
- Measurement speed times of 16.7ms, 14 channels, 100,001 points
