

Power Cable Assemblies

CDM SAFER Cable Power assemblies are designed and engineered to meet all applicable CMR, UL/NEC, CSA and NFPA requirements, and are best in class material and manufacturing techniques.

Applications include: Passenger Rail, Light Rail, Freight, Rolling Stock, Railway Stations, Airports, Museums, Shipboard, Submarine, Aerospace

Cable Specifications

- Power assemblies are fabricated using 14 AWG, 3 conductor low smoke/zero halogen cable with a 600V capacity but surprisingly light weight.

Connector Specifications

- SAFER cables are fabricated using overmolded military-grade grounded NEMA 5-15 and IEC 60320 C13 interconnects.
- These connectors are the standard for AC operation of PC's and computer peripherals.
